Bipolar and Related Disorders ............................................................. 10
  Bipolar I Disorder, Current or most recent episode hypomanic
    In partial remission
    In full remission

Depressive Disorders.............................................................................. 10
  Disruptive Mood Dysregulation Disorder
  Premenstrual Dysphoric Disorder
  Other Specified Depressive Disorder

Obsessive-Compulsive and Related Disorders ....................................... 12
  Obsessive-Compulsive Disorder
  Hoarding Disorder
  Trichotillomania (Hair-Pulling Disorder)
  Excoriation (Skin-Picking) Disorder
  Other Specified Obsessive-Compulsive and Related Disorder
  Unspecified Obsessive-Compulsive and Related Disorder

Trauma- and Stressor-Related Disorders ............................................. 15
  Adjustment Disorders

Feeding and Eating Disorders.............................................................. 16
  Pica, in adults
  Avoidant/Restrictive Food Intake Disorder
  Binge-Eating Disorder
  Other Specified Feeding or Eating Disorder

Sleep-Wake Disorders........................................................................... 18
  Insomnia Disorder
  Hypersomnia

Gender Dysphoria ................................................................................. 19
  Gender Dysphoria in Adolescents and Adults

Disruptive, Impulse-Control, and Conduct Disorders .......................... 19
  Kleptomania

Neurocognitive Disorders...................................................................... 20
  Major Neurocognitive Disorder Due to Alzheimer’s Disease
  Major Frontotemporal Neurocognitive Disorder
  Major Neurocognitive Disorder With Lewy Bodies
  Major Vascular Neurocognitive Disorder
  Major Neurocognitive Disorder Due to Parkinson’s Disease
New ICD-10-CM Coding Updates at a Glance

The following new ICD-10-CM codes are to be used for coding purposes in the United States starting October 1, 2016. For ICD-10-CM Coding Updates in Detail, which list each DSM-5 and DSM-5 Desk Reference page where the code appears, see pp. 9–29.

### Listing of DSM-5 Diagnoses and New ICD-10-CM Codes

<td>F63.2</td>
</tr>
</tbody>
</table>

#### Major Neurocognitive Disorders With Possible Etiologies

The following coding updates ensure that insurance reimbursement can be obtained when the specifier “With behavioral disturbance” is used for the possible major neurocognitive disorders. The possible major neurocognitive disorders should be coded in the same way as their respective probable major neurocognitive disorders, as noted below. For excerpts of the DSM-5 sections with these changes, see pp. 20–29 of this DSM-5® Update.

<table>
<thead>
<tr>
<th>Disorder</th>
<th>Original</th>
<th>Update*</th>
</tr>
</thead>
<tbody>
<tr>
<td>Major Neurocognitive Disorder Possibly Due to Vascular Disease</td>
<td>G31.9</td>
<td>F01.51 With behavioral disturbance or F01.50 Without behavioral disturbance</td>

</tbody>
</table>
Prior Criteria Updates

This content is unchanged from the prior DSM-5 Update (August 2015).

Key: **Underlined** text is to be added; **struck-out** text is to be deleted.

### Neurodevelopmental Disorders

**Autism Spectrum Disorder: Criterion A**

*(DSM-5, p. 50; Desk Reference, p. 27)*

| As printed | A. Persistent deficits in social communication and social interaction across multiple contexts, as manifested by the following, currently or by history (examples are illustrative, not exhaustive; see text): |
| As updated | A. Persistent deficits in social communication and social interaction across multiple contexts, as manifested by all of the following, currently or by history (examples are illustrative, not exhaustive; see text): |

**Reason for update**

*This update clarifies that all three items in Criterion A are required.*

### Schizophrenia Spectrum and Other Psychotic Disorders

**Brief Psychotic Disorder: “With Peripartum Onset” Specifier**

*(DSM-5, p. 94; Desk Reference, p. 48)*

| As printed | With postpartum onset: |
| As updated | With postpartum-peripartum onset: |

*Corresponding update in DSM-5 Classification, Brief Psychotic Disorder*  
*(DSM-5, p. xv; Desk Reference, p. xii)*

| As printed | Specify if: With marked stressor(s), Without marked stressor(s), With postpartum onset |
| As updated | Specify if: With marked stressor(s), Without marked stressor(s), With postpartum-peripartum onset |

**Reason for update**

*“Peripartum” is correct.*

### Bipolar and Related Disorders

**Bipolar I Disorder: Manic Episode, Criterion A**

*(DSM-5, p. 124; Desk Reference, p. 65)*

| As printed | A. A distinct period of abnormally and persistently elevated, expansive, or irritable mood and abnormally and persistently increased goal-directed activity or energy, lasting at least 1 week and present most of the day, nearly every day (or any duration if hospitalization is necessary). |
| As updated | A. A distinct period of abnormally and persistently elevated, expansive, or irritable mood and abnormally and persistently increased goal-directed activity or energy, lasting at least 1 week and present most of the day, nearly every day (or any duration if hospitalization is necessary). |

**Reason for update**

*The term “goal directed” is removed in Criterion A so that goal-directed activity is not required for criteria to be met for manic episode; “goal-directed activity” is included in the criteria for manic episode only once, in Criterion B6.*
Bipolar I Disorder: Hypomanic Episode, Criterion F

*DSM-5, p. 125; Desk Reference, p. 67*

Bipolar II Disorder: Hypomanic Episode, Criterion F

*DSM-5, p. 133; Desk Reference, p. 72*

**As printed**

F. The episode is not attributable to the physiological effects of a substance (e.g., a drug of abuse, a medication, other treatment).

**As updated**

F. The episode is not attributable to the physiological effects of a substance (e.g., a drug of abuse, a medication, other treatment) or another medical condition.

**Reason for update**

The addition of “or another medical condition” in Criterion F is now comparable to all other mood episode diagnostic criteria that rule out organic causes (i.e., the episode is not attributable to the physiological effects of a substance or another medical condition).

---

**Bipolar II Disorder: “With Melancholic Features” and “With Atypical Features” Specifiers**

*DSM-5, p. 135; Desk Reference, p. 75*

**As printed**

With rapid cycling
With mood-congruent psychotic features

**As updated**

With rapid cycling
With melancholic features (p. 151)
With atypical features (pp. 151–152)
With mood-congruent psychotic features

**Reason for update**

The inclusion of these major depressive episode specifiers for bipolar II disorder (as for bipolar I disorder) is correct.

---

**Bipolar II Disorder: “With Seasonal Pattern” Specifier**

*DSM-5, p. 135; Desk Reference, p. 75*

**As printed**

Applies only to the pattern of major depressive episodes.

**As updated**

Applies only to the pattern of major depressive episodes.

**Reason for update**

The “with seasonal pattern” specifier applies to all mood episodes: manic, hypomanic, and major depressive episodes.

Additional update to “with seasonal pattern” specifier, Criterion D Note, second paragraph, second sentence

*DSM-5, pp. 153–154; Desk Reference, p. 91*

**As printed**

This specifier does not apply to those situations in which the pattern is better explained by seasonally linked psychosocial stressors (e.g., seasonal unemployment or school schedule). Major depressive episodes that occur in a seasonal pattern are often characterized by prominent energy, hypersomnia, overeating, weight gain, and a craving for carbohydrates.

**As updated**

This specifier does not apply to those situations in which the pattern is better explained by seasonally linked psychosocial stressors (e.g., seasonal unemployment or school schedule). Major depressive episodes that occur in a seasonal pattern are often characterized by prominent loss of energy, hypersomnia, overeating, weight gain, and a craving for carbohydrates.

**Reason for update**

“Loss of energy” is correct.
Bipolar II Disorder: Severity Specifier
(DSM-5, p. 135; Desk Reference, p. 75)

As printed  Specify severity if full criteria for a mood episode are currently met:

As updated  Specify severity if full criteria for a mood-major depressive episode are currently met:

Corresponding update in DSM-5 Classification, Bipolar II Disorder
(DSM-5, p. xvi; Desk Reference, p. xiv)

As printed  Specify severity if full criteria for a mood episode are currently met: Mild, Moderate, Severe

As updated  Specify severity if full criteria for a mood-major depressive episode are currently met: Mild, Moderate, Severe

Reason for update  The severity specifiers “mild,” “moderate,” and “severe” apply when full criteria are met for a major depressive episode of bipolar II disorder.

Specifiers for Bipolar and Related Disorders: Severity Specifiers
(DSM-5, p. 154; Desk Reference, p. 92)

As printed  In full remission: During the past 2 months, no significant signs or symptoms of the disturbance were present.

Specify current severity:
Severity is based on the number of criterion symptoms, the severity of those symptoms, and the degree of functional disability.

Mild: Few, if any, symptoms in excess of those required to meet the diagnostic criteria are present, the intensity of the symptoms is distressing but manageable, and the symptoms result in minor impairment in social or occupational functioning.

Moderate: The number of symptoms, intensity of symptoms, and/or functional impairment are between those specified for “mild” and “severe.”

Severe: The number of symptoms is substantially in excess of those required to make the diagnosis, the intensity of the symptoms is seriously distressing and unmanageable, and the symptoms markedly interfere with social and occupational functioning.

As updated  In full remission: During the past 2 months, no significant signs or symptoms of the disturbance were present.

Specify current severity of manic episode:
Severity is based on the number of criterion symptoms, the severity of those symptoms, and the degree of functional disability.

Mild: Minimum symptom criteria are met for a manic episode.

Moderate: Very significant increase in activity or impairment in judgment.

Severe: Almost continual supervision is required in order to prevent physical harm to self or others.

Specify current severity of major depressive episode:
Severity is based on the number of criterion symptoms, the severity of those symptoms, and the degree of functional disability.

Mild: Few, if any, symptoms in excess of those required to meet the diagnostic criteria are present, the intensity of the symptoms is distressing but manageable, and the symptoms result in minor impairment in social or occupational functioning.

Moderate: The number of symptoms, intensity of symptoms, and/or functional impairment are between those specified for “mild” and “severe.”

Severe: The number of symptoms is substantially in excess of those required to make the diagnosis, the intensity of the symptoms is seriously distressing and unmanageable, and the symptoms markedly interfere with social and occupational functioning.

Reason for update  Separate severity specifiers for manic episode are added to enhance clarity. The severity specifiers for manic episode are adapted from DSM-IV.
Depressive Disorders

Major Depressive Disorder: “With Mixed Features” Specifier, Criterion A

(DSM-5, p. 184; Desk Reference, p. 108)

As printed  
A. At least three of the following manic/hypomanic symptoms are present nearly every day during the majority of days of a major depressive episode:

As updated  
A. At least three of the following manic/hypomanic symptoms are present nearly every day during the majority of days of a major depressive episode:

Reason for update  
This update removes an unneeded phrase.

Specifiers for Depressive Disorders: “With Seasonal Pattern” Specifier, Criterion D Note

(second paragraph)

(DSM-5, p. 187; Desk Reference, p. 113)

As printed  
This specifier does not apply to those situations in which the pattern is better explained by seasonally linked psychosocial stressors (e.g., seasonal unemployment or school schedule). Major depressive episodes that occur in a seasonal pattern are often characterized by prominent energy, hypersomnia, overeating, weight gain, and a craving for carbohydrates.

As updated  
This specifier does not apply to those situations in which the pattern is better explained by seasonally linked psychosocial stressors (e.g., seasonal unemployment or school schedule). Major depressive episodes that occur in a seasonal pattern are often characterized by prominent loss of energy, hypersomnia, overeating, weight gain, and a craving for carbohydrates.

Reason for update  
“Loss of energy” is correct.

Alternative DSM-5 Model for Personality Disorders

Obsessive-Compulsive Personality Disorder: Proposed Diagnostic Criterion B1

(DSM-5, p. 768)

As printed  
1. *Rigid perfectionism* (an aspect of extreme Conscientiousness [the opposite pole of Detachment]):

As updated  
1. *Rigid perfectionism* (an aspect of extreme Conscientiousness [the opposite pole of Detachment Disinhibition]):

Reason for update  
“Disinhibition” is correct.

Conditions for Further Study

Depressive Episodes With Short-Duration Hypomania: Proposed Criterion A

(DSM-5, p. 787)

As printed  
A. A distinct period of abnormally and persistently elevated, expansive, or irritable mood and abnormally and persistently increased goal-directed activity or energy.

As updated  
A. A distinct period of abnormally and persistently elevated, expansive, or irritable mood and abnormally and persistently increased goal-directed activity or energy.

Reason for update  
In keeping with Criterion A for hypomanic episode in bipolar I and bipolar II disorders, the term “goal-directed” is removed in Proposed Criterion A; “goal-directed activity” is included in Criterion B6 for this proposed criteria as it is for hypomanic episode for bipolar I and bipolar II disorders.
Prior Text Updates

This content is unchanged from the prior DSM-5 Update (August 2015).

Key: Underlined text is to be added; strikethrough text is to be deleted.

Schizophrenia Spectrum and Other Psychotic Disorders

Delusional Disorder: Subtypes

<table>
<thead>
<tr>
<th>Location</th>
<th>DSM-5, p. 92: Revise lines 9 and 10 from top of page</th>
</tr>
</thead>
<tbody>
<tr>
<td>As printed</td>
<td>Somatic delusions can occur in several forms. Most common is the belief that the individual emits a foul odor; that there is an infestation of insects on or in the skin; that there is an internal parasite; certain parts of the body are misshapen or ugly; or that parts of the body are not functioning.</td>
</tr>
<tr>
<td>As updated</td>
<td>Somatic delusions can occur in several forms. Most common is the belief that the individual emits a foul odor; that there is an infestation of insects on or in the skin; that there is an internal parasite; certain parts of the body are misshapen or ugly; or that parts of the body are not functioning.</td>
</tr>
<tr>
<td>Reason for update</td>
<td>Somatic delusions that certain parts of the body are misshapen or ugly are diagnosed as body dysmorphic disorder, with absent insight, and not as delusional disorder. Without this update, the text suggests that such delusions should be diagnosed as delusional disorder.</td>
</tr>
</tbody>
</table>

Depressive Disorders

Disruptive Mood Dysregulation Disorder: Development and Course

<table>
<thead>
<tr>
<th>Location</th>
<th>DSM-5, p. 157: First paragraph of section, revise line 6</th>
</tr>
</thead>
<tbody>
<tr>
<td>As printed</td>
<td>Because the symptoms of disruptive mood dysregulation disorder are likely to change as children mature, use of the diagnosis should be restricted to age groups similar to those in which validity has been established (7–18 years).</td>
</tr>
<tr>
<td>As updated</td>
<td>Because the symptoms of disruptive mood dysregulation disorder are likely to change as children mature, use of the diagnosis should be restricted to age groups similar to those in which validity has been established (7–18 years).</td>
</tr>
<tr>
<td>Reason for update</td>
<td>The age range at which disruptive mood dysregulation disorder can be diagnosed and for which validity is established is age 6–18 years, as noted in Criterion G.</td>
</tr>
</tbody>
</table>

Persistent Depressive Disorder: Differential Diagnosis

<table>
<thead>
<tr>
<th>Location</th>
<th>DSM-5, pp. 170–171: Revise second and third lines at top of p. 171</th>
</tr>
</thead>
<tbody>
<tr>
<td>As printed</td>
<td>If the symptom criteria are sufficient for a diagnosis of a major depressive episode at any time during this period, then the diagnosis of major depression should be noted, but it is coded not as a separate diagnosis but rather as a specifier with the diagnosis of persistent depressive disorder.</td>
</tr>
<tr>
<td>As updated</td>
<td>If the symptom criteria are sufficient for a diagnosis of a major depressive episode at any time during this period, then the diagnosis of major depression should be noted made, but it is coded not as a separate diagnosis but rather and also noted as a specifier with the diagnosis of persistent depressive disorder.</td>
</tr>
<tr>
<td>Reason for update</td>
<td>This update clarifies that both major depressive disorder and persistent depressive disorder may be diagnosed comorbidly.</td>
</tr>
</tbody>
</table>
Anxiety Disorders

Generalized Anxiety Disorder: Differential Diagnosis

Location  
DSM-5, pp. 225–226: Revise last two lines of p. 225 through top two lines of p. 226

As printed  
Depressive, bipolar, and psychotic disorders. Generalized anxiety/worry is a common associated feature of depressive, bipolar, and psychotic disorders and should not be diagnosed separately if the excessive worry has occurred only during the course of these conditions.

As updated  
Depressive, bipolar, and psychotic disorders. Although generalized anxiety/worry is a common associated feature of depressive, bipolar, and psychotic disorders, generalized anxiety disorder may be diagnosed comorbidly if the anxiety/worry is sufficiently severe to warrant clinical attention, and should not be diagnosed separately if the excessive worry has occurred only during the course of these conditions.

Reason for update  
This update resolves a discrepancy between the diagnostic criteria and the text. In certain cases, generalized anxiety disorder may be diagnosed with depressive, bipolar, and psychotic disorders as noted above and in consideration of the diagnostic criteria.

Trauma- and Stressor-Related Disorders

Acute Stress Disorder: Differential Diagnosis

Location  
DSM-5, p. 285: First paragraph, first line of “Adjustment disorders” section

As printed  
Adjustment disorders. In acute stress disorder, the stressor can be of any severity rather than of the severity and type required by Criterion A of acute stress disorder.

As updated  
Adjustment disorders. In acute stress disorder in adjustment disorders, the stressor can be of any severity rather than of the severity and type required by Criterion A of acute stress disorder.

Reason for update  
“In adjustment disorders” is correct.

Somatic Symptom and Related Disorders

Somatic Symptom Disorder: Differential Diagnosis

Location  
DSM-5, p. 314: First paragraph, delete second sentence

As printed  
If the somatic symptoms are consistent with another mental disorder (e.g., panic disorder), and the diagnostic criteria for that disorder are fulfilled, then that mental disorder should be considered as an alternative or additional diagnosis. A separate diagnosis of somatic symptom disorder is not made if the somatic symptoms and related thoughts, feelings, or behaviors occur only during major depressive episodes. If, as commonly occurs, the criteria for both somatic symptom disorder and another mental disorder diagnosis are fulfilled, then both should be coded, as both may require treatment.

As updated  
If the somatic symptoms are consistent with another mental disorder (e.g., panic disorder), and the diagnostic criteria for that disorder are fulfilled, then that mental disorder should be considered as an alternative or additional diagnosis. A separate diagnosis of somatic symptom disorder is not made if the somatic symptoms and related thoughts, feelings, or behaviors occur only during major depressive episodes. If, as commonly occurs, the criteria for both somatic symptom disorder and another mental disorder diagnosis are fulfilled, then both should be coded, as both may require treatment.

Reason for update  
This update resolves a discrepancy between the diagnostic criteria and the text, adhering to the criteria for somatic symptom disorder. The criteria do not exclude symptoms during depressive episodes.
ICD-10-CM Coding Updates in Detail

See the boxes with yellow highlighted text for new ICD-10-CM codes to be used for coding purposes in the United States starting October 1, 2016. The new codes are listed for each applicable page in DSM-5 and the DSM-5 Desk Reference. Original ICD-10-CM codes are to be used through September 30, 2016.

Prior ICD-10-CM updates (effective since October 1, 2015) are retained for reference (unboxed). Replacement codes and other notes are in boldface type to aid visual reference only.

Neurodevelopmental Disorders

ICD-10-CM coding changes for Language Disorder

Codes are found on the following pages: DSM-5: pp. xiii, 42, 848, 891;
Desk Reference: pp. x, 24

**DSM-5 Classification**, Neurodevelopmental Disorders, Communication Disorders,
Language Disorder, p. xiii (Desk Reference, p. x):
- Change F80.9 to **F80.2**

**DSM-5 criteria, ICD-10-CM code** for **Language Disorder** should be revised as follows, p. 42
(Desk Reference, p. 24):
- Change F80.9 to **F80.2**

**Alphabetical Listing**, p. 848 *(not applicable to Desk Reference)*
Change the codes for Language disorder as follows:
- Change F80.9 to **F80.2**

**Numerical Listing (ICD-10-CM)**, p. 891 *(not applicable to Desk Reference)*
Change the code for Language disorder as follows:
- Change F80.9 to **F80.2**
  - Move **F80.2 Language disorder** to follow “F80.0 Speech sound disorder”

NEW ICD-10-CM coding change for Social (Pragmatic) Communication Disorder

Codes are found on the following pages: DSM-5: pp. xiii, 47, 859, 891;
Desk Reference: pp. x, 26

**DSM-5 Classification**, Neurodevelopmental Disorders, Communication Disorders,
Social (Pragmatic) Communication Disorder, p. xiii (Desk Reference, p. x):
- Change F80.89 to **F80.82**

**DSM-5 criteria, ICD-10-CM code** for **Social (Pragmatic) Communication Disorder** should be revised as follows, p. 47 (Desk Reference, p. 26):
- Change F80.89 to **F80.82**

**Alphabetical Listing**, p. 859 *(not applicable to Desk Reference)*
Change the ICD-10-CM code for Social (pragmatic) communication disorder as follows:
- Change F80.89 to **F80.82**

**Numerical Listing (ICD-10-CM)**, p. 891 *(not applicable to Desk Reference)*
Change the ICD-10-CM code for Social (pragmatic) communication disorder as follows:
- Change F80.89 to **F80.82**
Bipolar and Related Disorders

ICD-10-CM coding changes to Bipolar I Disorder, Current or most recent episode hypomanic

Codes are found on the following pages: DSM-5: pp. xvi, 127, 842, 888;
Desk Reference: pp. xiv, 70

**DSM-5 Classification**, Bipolar and Related Disorders, Bipolar I Disorder, Current or most recent episode hypomanic, p. xvi (Desk Reference, p. xiv):
- ICD-10-CM code F31.73 should be changed to **F31.71**, In partial remission
- ICD-10-CM code F31.74 should be changed to **F31.72**, In full remission

**DSM-5 criteria, coding table** for Bipolar I Disorder should be revised as follows, p. 127 (Desk Reference, p. 70):
- In partial remission, Current or most recent episode hypomanic:
  - Change F31.73 to **F31.71**
- In full remission, Current or most recent episode hypomanic:
  - Change F31.74 to **F31.72**

**Alphabetical Listing**, p. 842 (*not applicable to Desk Reference*)

Replace the ICD-10-CM codes as follows for Bipolar I disorder, Current or most recent episode hypomanic:
- Change F31.74 to **F31.72** In full remission
- Change F31.73 to **F31.71** In partial remission

**Numerical Listing (ICD-10-CM)**, p. 888 (*not applicable to Desk Reference*)

Please change codes and reorder listing as follows:
**F31.71** Bipolar I disorder, Current or most recent episode hypomanic, In partial remission
**F31.72** Bipolar I disorder, Current or most recent episode hypomanic, In full remission
**F31.73** Bipolar I disorder, Current or most recent episode manic, In full remission
**F31.74** Bipolar I disorder, Current or most recent episode manic, In partial remission

Depressive Disorders

**NEW ICD-10-CM coding change for Disruptive Mood Dysregulation Disorder**

Codes are found on the following pages: DSM-5: pp. xvii, 156, 847, 888;
Desk Reference: pp. xv, 93

**DSM-5 Classification**, Depressive Disorders, Disruptive Mood Dysregulation Disorder, p. xvii (Desk Reference, p. xv):
- Change F34.8 to **F34.81**

**DSM-5 criteria, ICD-10-CM code** for Disruptive Mood Dysregulation Disorder should be revised as follows, p. 156 (Desk Reference, p. 93):
- Change F34.8 to **F34.81**

**Alphabetical Listing**, p. 847 (*not applicable to Desk Reference*)

Change the ICD-10-CM code for Disruptive mood dysregulation disorder as follows:
- Change F34.8 to **F34.81**

**Numerical Listing (ICD-10-CM)**, p. 888 (*not applicable to Desk Reference*)

Change the ICD-10-CM code for Disruptive mood dysregulation disorder as follows:
- Change F34.8 to **F34.81**
Depressive Disorders (continued)

NEW ICD-10-CM coding change for Premenstrual Dysphoric Disorder

Codes are found on the following pages: DSM-5: pp. xviii, 171, 857, 893; add to p. 888; Desk Reference: pp. xvi, 100

**DSM-5 Classification**, Depressive Disorders, Premenstrual Dysphoric Disorder, p. xviii (Desk Reference, p. xvi):
- Change N94.3 to F32.81

**DSM-5 criteria, ICD-10-CM code for Premenstrual Dysphoric Disorder** should be revised as follows, p. 171 (Desk Reference, p. 100):
- Change N94.3 to F32.81

**Alphabetical Listing**, p. 857 (not applicable to Desk Reference)

Change the ICD-10-CM code for Premenstrual dysphoric disorder as follows:
- Change N94.3 to F32.81

**Numerical Listing (ICD-10-CM)**, p. 893; p. 888 (not applicable to Desk Reference)

Change the ICD-10-CM code for Premenstrual dysphoric disorder as follows:
- p. 893: Change N94.3 to F32.81
- p. 893: Remove F32.81 Premenstrual dysphoric disorder
- p. 888: Add **F32.81 Premenstrual dysphoric disorder** to follow
  "F32.5 Major depressive disorder, Single episode, In full remission""
Obsessive-Compulsive and Related Disorders

NEW ICD-10-CM coding change for Obsessive-Compulsive Disorder
Codes are found on the following pages: DSM-5: pp. xix, 237, 851, 889;
Desk Reference: pp. xviii, 129

**DSM-5 Classification**, Obsessive-Compulsive and Related Disorders,
Obsessive-Compulsive Disorder, p. xix (Desk Reference, p. xviii):
  - Change F42 to **F42.2**

**DSM-5 criteria, ICD-10-CM code for Obsessive-Compulsive Disorder** should be revised
as follows, p. 237 (Desk Reference, p. 129):
  - Change F42 to **F42.2**

**Alphabetical Listing**, p. 851 (*not applicable to Desk Reference*)
  Change the ICD-10-CM code for Obsessive-compulsive disorder as follows:
  - Change F42 to **F42.2**

**Numerical Listing (ICD-10-CM)**, p. 889 (*not applicable to Desk Reference*)
  Change the ICD-10-CM code for Obsessive-compulsive disorder as follows:
  - Change F42 to **F42.2**
  - Move **F42.2 Obsessive-compulsive disorder** to precede
    **F42.3 Hoarding disorder**

NEW ICD-10-CM coding change for Hoarding Disorder
Codes are found on the following pages: DSM-5: pp. xix, 247, 847, 889;
Desk Reference: pp. xviii, 132

**DSM-5 Classification**, Obsessive-Compulsive and Related Disorders, Hoarding Disorder,
p. xix (Desk Reference, p. xviii):
  - Change F42 to **F42.3**

**DSM-5 criteria, ICD-10-CM code for Hoarding Disorder** should be revised as follows,
p. 247 (Desk Reference, p. 132):
  - Change F42 to **F42.3**

**Alphabetical Listing**, p. 847 (*not applicable to Desk Reference*)
  Change the ICD-10-CM code for Hoarding disorder as follows:
  - Change F42 to **F42.3**

**Numerical Listing (ICD-10-CM)**, p. 889 (*not applicable to Desk Reference*)
  Change the ICD-10-CM code for Hoarding disorder as follows:
  - Change F42 to **F42.3**
  - Move **F42.3 Hoarding disorder** to follow **F42.2 Obsessive-compulsive disorder**
Obsessive-Compulsive and Related Disorders (continued)

ICD-10-CM coding change for Trichotillomania (Hair-Pulling Disorder)

Codes are found on the following pages: DSM-5: pp. xix, 251, 861, 890;
Desk Reference: pp. xviii, 133

**DSM-5 Classification**, Obsessive-Compulsive and Related Disorders, Trichotillomania
(Hair-Pulling Disorder), p. xix (Desk Reference, p. xviii):
- Change F63.2 to F63.3

**DSM-5 criteria, ICD-10-CM code** for Trichotillomania (Hair-Pulling Disorder) should be
revised as follows, p. 251 (Desk Reference, p. 133):
- Change F63.2 to F63.3

**Alphabetical Listing**, p. 861 (not applicable to Desk Reference)
Replace the ICD-10-CM code for Trichotillomania (hair-pulling disorder) as follows:
- Change F63.2 to F63.3

**Numerical Listing (ICD-10-CM)**, p. 890 (not applicable to Desk Reference)
Change the ICD-10-CM code for Trichotillomania (hair-pulling disorder) as follows:
- Change F63.2 to F63.3
- Move F63.3 Trichotillomania (hair-pulling disorder) to precede
  “F63.81 Intermittent explosive disorder”

![NEW ICD-10-CM coding change for Excoriation (Skin-Picking) Disorder](image)

Codes are found on the following pages: DSM-5: pp. xix, 254, 847, 893; add to p. 889;
Desk Reference: pp. xviii, 133

**DSM-5 Classification**, Obsessive-Compulsive and Related Disorders,
Excoriation (Skin-Picking) Disorder, p. xix (Desk Reference, p. xviii):
- Change L98.1 to F42.4

**DSM-5 criteria, ICD-10-CM code** for Excoriation (Skin-Picking) Disorder should be
revised as follows, p. 254 (Desk Reference, p. 133):
- Change L98.1 to F42.4

**Alphabetical Listing**, p. 847 (not applicable to Desk Reference)
Change the ICD-10-CM code for Excoriation (skin-picking) disorder as follows:
- Change L98.1 to F42.4

**Numerical Listing (ICD-10-CM)**, p. 893; p. 889 (not applicable to Desk Reference)
Change the ICD-10-CM code for Excoriation (skin-picking) disorder as follows:
- p. 893: Change L98.1 to F42.4
- p. 893: Remove F42.4 Excoriation (skin-picking) disorder
- p. 889: Add F42.4 Excoriation (skin-picking) disorder to follow
  F42.3 Hoarding disorder
NEW ICD-10-CM coding change for
Other Specified Obsessive-Compulsive and Related Disorder
Codes are found on the following pages: DSM-5: pp. xix, 263, 854, 889;
 Desk Reference: pp. xviii, 138

**DSM-5 Classification**, Obsessive-Compulsive and Related Disorders,
Other Specified Obsessive-Compulsive and Related Disorder, p. xix
(Desk Reference, p. xviii):
• Change F42 to **F42.8**

**DSM-5 criteria, ICD-10-CM code** for Other Specified Obsessive-Compulsive and
Related Disorder should be revised as follows, p. 263 (Desk Reference, p. 138):
• Change F42 to **F42.8**

**Alphabetical Listing**, p. 854 (*not applicable to Desk Reference*)
Change the ICD-10-CM code for Other specified obsessive-compulsive and
related disorder as follows:
• Change F42 to **F42.8**

**Numerical Listing (ICD-10-CM)**, p. 889 (*not applicable to Desk Reference*)
Change the ICD-10-CM code for Other specified obsessive-compulsive and
related disorder as follows:
• Change F42 to **F42.8**

NEW ICD-10-CM coding change for
Unspecified Obsessive-Compulsive and Related Disorder
Codes are found on the following pages: DSM-5: pp. xix, 264, 862, 889;
 Desk Reference: pp. xviii, 140

**DSM-5 Classification**, Obsessive-Compulsive and Related Disorders,
Unspecified Obsessive-Compulsive and Related Disorder, p. xix
(Desk Reference, p. xviii):
• Change F42 to **F42.9**

**DSM-5 criteria, ICD-10-CM code** for Unspecified Obsessive-Compulsive and
Related Disorder should be revised as follows, p. 264 (Desk Reference, p. 140):
• Change F42 to **F42.9**

**Alphabetical Listing**, p. 862 (*not applicable to Desk Reference*)
Change the ICD-10-CM code for Unspecified obsessive-compulsive and
related disorder as follows:
• Change F42 to **F42.9**

**Numerical Listing (ICD-10-CM)**, p. 889 (*not applicable to Desk Reference*)
Change the ICD-10-CM code for Unspecified obsessive-compulsive and
related disorder as follows:
• Change F42 to **F42.9**
Trauma- and Stressor-Related Disorders

Add specifiers for Adjustment Disorders

(ICD-CM codes remain unchanged)

Specifiers are added on the following pages: DSM-5: pp. xx, 287; Desk Reference: pp. xix, 152

**DSM-5 Classification**, Trauma- and Stressor-Related Disorders, Adjustment Disorders, p. xx

(Desk Reference, p. xix):

New specifiers are added as shown (see highlighted text):

___._ (_._._) Adjustment Disorders

**AFTER**

Specify whether:

309.0 (F43.21) With depressed mood

... [codes and subtypes continue as printed]

309.9 (F43.20) Unspecified

**ADD**

Specify if: Acute, Persistent (chronic)

**DSM-5 criteria for Adjustment Disorders** should be revised as follows (see highlighted text), p. 287 (Desk Reference, p. 152):

**AFTER**

Specify whether:

309.0 (F43.21) With depressed mood: Low mood, tearfulness, or feelings of hopelessness are predominant.

... [codes and subtypes continue as printed]

309.9 (F43.20) Unspecified: For maladaptive reactions that are not classifiable as one of the specific subtypes of adjustment disorder.

**ADD**

Specify if:

Acute: If the disturbance lasts less than 6 months

Persistent (chronic): If the disturbance lasts for 6 months or longer
### Feeding and Eating Disorders

#### NEW ICD-10-CM coding change for Pica, in adults

Codes are found on the following pages: DSM-5: pp. xxi, 330, 857, 890; Desk Reference: pp. xxi, 169

**DSM-5 Classification**, Feeding and Eating Disorders, Pica, in adults, p. xxi (Desk Reference, p. xxi):
- Change F50.8 to **F50.89**

**DSM-5 criteria, Coding note, ICD-10-CM code for Pica, in adults**, should be revised as follows, p. 330 (Desk Reference, p. 169):
- Change F50.8 to **F50.89**

**Alphabetical Listing**, p. 857 *(not applicable to Desk Reference)*
- Change the ICD-10-CM code for Pica, in adults, as follows:
  - Change F50.8 to **F50.89**

**Numerical Listing (ICD-10-CM)**, p. 890 *(not applicable to Desk Reference)*
- Change the ICD-10-CM code for Pica, in adults, as follows:
  - Change F50.8 to **F50.89**

#### NEW ICD-10-CM coding change for Avoidant/Restrictive Food Intake Disorder

Codes are found on the following pages: DSM-5: pp. xxi, 334, 842, 889; Desk Reference: pp. xxi, 170

**DSM-5 Classification**, Feeding and Eating Disorders, Avoidant/Restrictive Food Intake Disorder, p. xxi (Desk Reference, p. xxi):
- Change F50.8 to **F50.89**

**DSM-5 criteria, ICD-10-CM code for Avoidant/Restrictive Food Intake Disorder** should be revised as follows, p. 334 (Desk Reference, p. 170):
- Change F50.8 to **F50.89**

**Alphabetical Listing**, p. 842 *(not applicable to Desk Reference)*
- Change the ICD-10-CM code for Avoidant/restrictive food intake disorder as follows:
  - Change F50.8 to **F50.89**

**Numerical Listing (ICD-10-CM)**, p. 889 *(not applicable to Desk Reference)*
- Change the ICD-10-CM code for Avoidant/restrictive food intake disorder as follows:
  - p. 889: Change F50.8 to **F50.89**
Feeding and Eating Disorders (continued)

NEW ICD-10-CM coding change for Binge-Eating Disorder
Codes are found on the following pages: DSM-5: pp. xxi, 350, 842, 890; move to p. 889 possible; Desk Reference: pp. xxi, 174

**DSM-5 Classification**, Feeding and Eating Disorders, Binge-Eating Disorder, p. xxi
(Desk Reference, p. xxii):
- Change F50.8 to **F50.81**

**DSM-5 criteria, ICD-10-CM code** for Binge-Eating Disorder should be revised as follows, p. 350 (Desk Reference, p. 174):
- Change F50.8 to **F50.81**

**Alphabetical Listing**, p. 842 (not applicable to Desk Reference)
Change the ICD-10-CM code for Binge-eating disorder as follows:
- Change F50.8 to **F50.81**

**Numerical Listing (ICD-10-CM)**, p. 890; p. 889 (not applicable to Desk Reference)
Change the ICD-10-CM code for Binge-eating disorder as follows:
- p. 890: Change F50.8 to **F50.81**
- p. 890: Remove **F50.81 Binge-eating disorder**
- p. 889: Add **F50.81 Binge-eating disorder** to precede **F50.89 Avoidant/restrictive food intake disorder**

NEW ICD-10-CM coding change for Other Specified Feeding or Eating Disorder
Codes are found on the following pages: DSM-5: pp. xxi, 353, 854, 890; Desk Reference: pp. xxi, 175

**DSM-5 Classification**, Feeding and Eating Disorders, Other Specified Feeding or Eating Disorder, p. xxi (Desk Reference, p. xxii):
- Change F50.8 to **F50.89**

**DSM-5 criteria, ICD-10-CM code** for Other Specified Feeding or Eating Disorder should be revised as follows, p. 353 (Desk Reference, p. 175):
- Change F50.8 to **F50.89**

**Alphabetical Listing**, p. 854 (not applicable to Desk Reference)
Change the ICD-10-CM code for Other specified feeding or eating disorder as follows:
- Change F50.8 to **F50.89**

**Numerical Listing (ICD-10-CM)**, p. 890 (not applicable to Desk Reference)
Change the ICD-10-CM code for Other specified feeding or eating disorder as follows:
- Change F50.8 to **F50.89**
Sleep-Wake Disorders

**ICD-10-CM coding changes for Insomnia Disorder and Hypersomnolence Disorder**
Codes are found on the following pages:

- Insomnia Disorder: DSM-5: pp. xxii, 362 (also change code in coding note), 848, 890, 892
  Desk Reference: pp. xxii, 181, 182 (change code in coding note)
- Hypersomnolence Disorder: DSM-5: pp. xxii, 368, 369 (change code in coding note), 847, 890, 892
  Desk Reference: pp. xxii, 182, 183 (change code in coding note)

**DSM-5 Classification**, Sleep-Wake Disorders, change ICD-10-CM codes for Insomnia Disorder and Hypersomnolence Disorder, p. xxii (Desk Reference, p. xxii):

Insomnia Disorder
- Change G47.00 to **F51.01**

Hypersomnolence Disorder
- Change G47.10 to **F51.11**

**DSM-5 criteria, ICD-10-CM codes** should be revised as follows:

**Insomnia Disorder**
Codes in “Diagnostic Criteria,” p. 362 (Desk Reference, p. 181):
- Change G47.00 to **F51.01**
- Coding note, p. 362 (Desk Reference, p. 182):
  - Change G47.00 to **F51.01**

**Hypersomnolence Disorder**
Codes in “Diagnostic Criteria,” p. 368 (Desk Reference, p. 182):
- Change G47.10 to **F51.11**
- Coding note, p. 369 (Desk Reference, p. 183):
  - Change G47.10 to **F51.11**

**Alphabetical Listing** *(not applicable to Desk Reference)*

- Hypersomnolence disorder, p. 847
  - Change G47.10 to **F51.11**

- Insomnia disorder, p. 848
  - Change G47.00 to **F51.01**

**Numerical Listing (ICD-10-CM)**, p. 890 *(not applicable to Desk Reference)*
After “F50.9 Unspecified feeding or eating disorder,” **ADD**
- **F51.01 Insomnia disorder**
- **F51.11 Hypersomnolence disorder**

**DELETE**
- G47.00 Insomnia disorder, p. 892
- G47.10 Hypersomnolence disorder, p. 892
### Gender Dysphoria

**NEW ICD-10-CM coding change for Gender Dysphoria in Adolescents and Adults**

Codes are found on the following pages: DSM-5: pp. xxiv, 452, 847, 890; Desk Reference: pp. xxv, 216

**DSM-5 Classification**, Gender Dysphoria, Gender Dysphoria in Adolescents and Adults, p. xxiv (Desk Reference, p. xxv):
- Change F64.1 to F64.0

**DSM-5 criteria, ICD-10-CM code** for Gender Dysphoria in Adolescents and Adults should be revised as follows, p. 452 (Desk Reference, p. 216):
- Change F64.1 to F64.0

**Alphabetical Listing**, p. 847 (*not applicable to Desk Reference*)

Change the ICD-10-CM code for Gender dysphoria in adolescents and adults as follows:
- Change F64.1 to F64.0

**Numerical Listing (ICD-10-CM)**, p. 890 (*not applicable to Desk Reference*)

Change the ICD-10-CM code for Gender dysphoria in adolescents and adults as follows:
- Change F64.1 to F64.0

### Disruptive, Impulse-Control, and Conduct Disorders

**ICD-10-CM coding change for Kleptomania**

Codes are found on the following pages: DSM-5: pp. xxiv, 478, 848, 890; Desk Reference: pp. xxvi, 225

**DSM-5 Classification**, Disruptive, Impulse-Control, and Conduct Disorders: Kleptomania, p. xxiv (Desk Reference, p. xxvi):
- Change F63.3 to F63.2

**DSM-5 criteria, ICD-10-CM code** for Kleptomania should be revised as follows, p. 478 (Desk Reference, p. 225):
- Change F63.3 to F63.2

**Alphabetical Listing**, p. 848 (*not applicable to Desk Reference*)

Replace the ICD-10-CM code as follows for Kleptomania:
- Change F63.3 to F63.2

**Numerical Listing (ICD-10-CM)**, p. 890 (*not applicable to Desk Reference*):
- Change F63.3 to F63.2 Kleptomania
- Move F63.2 Kleptomania to precede “F63.3 Trichotillomania (hair-pulling disorder)”
Neurocognitive Disorders

DSM-5 Classification Excerpt for Major Neurocognitive Disorders Due to Possible Etiologies

DSM-5, pp. xxx–xxxii; Desk Reference, pp. xxxiii–xxxvi

Updates to the DSM-5 Classification contain revised coding and notes for the major neurocognitive disorders due to possible etiologies (neurocognitive disorders without coding changes are not included):

- Major Neurocognitive Disorder Due to Alzheimer’s Disease
- Major Frontotemporal Neurocognitive Disorder
- Major Neurocognitive Disorder With Lewy Bodies
- Major Vascular Neurocognitive Disorder
- Major Neurocognitive Disorder Due to Parkinson’s Disease

Major and Mild Neurocognitive Disorders (602) [*299 in Desk Reference]

Specify whether due to: Alzheimer’s disease, Frontotemporal lobar degeneration, Lewy body disease, Vascular disease, Traumatic brain injury, Substance/medication use, HIV infection, Prion disease, Parkinson’s disease, Huntington’s disease, Another medical condition, Multiple etiologies, Unspecified

*aSpecify Without behavioral disturbance, With behavioral disturbance. For mild neurocognitive disorder, behavioral disturbance cannot be coded but should still be indicated in writing.

*bSpecify current severity: Mild, Moderate, Severe. This specifier applies only to major neurocognitive disorders (including probable and possible).

Note: As indicated for each subtype, an additional medical code is needed for major neurocognitive disorders, including those due to probable and possible medical etiologies. The medical etiology should be coded first, before the code for the major neurocognitive disorder. An additional medical code should not be used for mild neurocognitive disorder.

Major or Mild Neurocognitive Disorder Due to Alzheimer’s Disease (611) [*305 in Desk Reference]

(______) Major Neurocognitive Disorder Due to Probable Alzheimer’s Disease

Note: Code first G30.9 Alzheimer's disease.

(F02.81) With behavioral disturbance
(F02.80) Without behavioral disturbance

(______) Major Neurocognitive Disorder Due to Probable Alzheimer’s Disease

Note: Code first G30.9 Alzheimer's disease.

(F02.81) With behavioral disturbance
(F02.80) Without behavioral disturbance

(G31.84) Mild Neurocognitive Disorder Due to Alzheimer’s Disease

Major or Mild Frontotemporal Neurocognitive Disorder (614) [*306 in Desk Reference]

(______) Major Neurocognitive Disorder Due to Probable Frontotemporal Lobar Degeneration

Note: Code first G31.09 frontotemporal disease.

(F02.81) With behavioral disturbance
(F02.80) Without behavioral disturbance

(______) Major Neurocognitive Disorder Due to Probable Frontotemporal Lobar Degeneration

Note: Code first G31.09 frontotemporal disease.

(F02.81) With behavioral disturbance
(F02.80) Without behavioral disturbance

(G31.84) Mild Neurocognitive Disorder Due to Frontotemporal Lobar Degeneration
Neurocognitive Disorders
DSM-5 Classification Excerpt for
Major Neurocognitive Disorders Due to Possible Etiologies *(continued)*

Major or Mild Neurocognitive Disorder With Lewy Bodies (618) *(308 in Desk Reference)*

(____.) Major Neurocognitive Disorder With Probable Lewy Bodiesb

**Note:** Code first G31.83 Lewy body disease.

(F02.81) With behavioral disturbance
(F02.80) Without behavioral disturbance

(____.) Major Neurocognitive Disorder With Possible Lewy Bodiesb

**Note:** Code first G31.83 Lewy body disease.

(F02.81) With behavioral disturbance
(F02.80) Without behavioral disturbance

(G31.84) Mild Neurocognitive Disorder With Lewy Bodiesa

Major or Mild Vascular Neurocognitive Disorder (621) *(309 in Desk Reference)*

(____.) Major Neurocognitive Disorder Possibly Due to Vascular Diseaseb

**Note:** No additional medical code for vascular disease.

(F01.51) With behavioral disturbance
(F01.50) Without behavioral disturbance

(____.) Major Neurocognitive Disorder Possibly Due to Vascular Diseaseb

**Note:** No additional medical code for vascular disease.

(F01.51) With behavioral disturbance
(F01.50) Without behavioral disturbance

(G31.84) Mild Neurocognitive Disorder Due To Vascular Diseasea

Major or Mild Neurocognitive Disorder Due to Parkinson’s Disease (636)
*(316 in Desk Reference)*

(____.) Major Neurocognitive Disorder Probably Due to Parkinson's Diseaseb

**Note:** Code first G20 Parkinson's disease.

(F02.81) With behavioral disturbance
(F02.80) Without behavioral disturbance

(____.) Major Neurocognitive Disorder Possibly Due to Parkinson’s Diseaseb

**Note:** Code first G20 Parkinson's disease.

(F02.81) With behavioral disturbance
(F02.80) Without behavioral disturbance

(G31.84) Mild Neurocognitive Disorder Due to Parkinson’s Diseasea
**Neurocognitive Disorders**  
**Updated Coding Table**

Incorporates revisions for major neurocognitive disorders due to possible etiologies  
DSM-5, pp. 603–604; Desk Reference, pp. 302–304

**Coding note:** Code based on medical or substance etiology. In some cases, there is need for an additional code for the etiological medical condition, which must immediately precede the diagnostic code for major neurocognitive disorder, as follows:

<table>
<thead>
<tr>
<th>Etiological subtype</th>
<th>Associated etiological medical code for major neurocognitive disorder (^a)</th>
<th>Major neurocognitive disorder code (^b)</th>
<th>Mild neurocognitive disorder code (^c)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Alzheimer's disease</td>
<td>G30.9</td>
<td>F02.8x</td>
<td>G31.84 (Do not use additional code for Alzheimer's disease.)</td>
</tr>
<tr>
<td>Frontotemporal lobar degeneration</td>
<td>G31.09</td>
<td>F02.8x</td>
<td>G31.84 (Do not use additional code for frontotemporal disease.)</td>
</tr>
<tr>
<td>Lewy body disease</td>
<td>G31.83</td>
<td>F02.8x</td>
<td>G31.84 (Do not use additional code for Lewy body disease.)</td>
</tr>

### Neurocognitive Disorders
### Updated Coding Table (continued)

<table>
<thead>
<tr>
<th>Etiological subtype</th>
<th>Associated etiological medical code for major neurocognitive disorder&lt;sup&gt;a&lt;/sup&gt;</th>
<th>Major neurocognitive disorder code&lt;sup&gt;b&lt;/sup&gt;</th>
<th>Mild neurocognitive disorder code&lt;sup&gt;c&lt;/sup&gt;</th>
</tr>
</thead>
<tbody>
<tr>
<td>Due to another medical condition</td>
<td>Code the other medical condition first (e.g., G35 multiple sclerosis)</td>
<td>F02.8x</td>
<td>G31.84 (Do not use additional codes for the presumed etiological medical conditions.)</td>
</tr>
<tr>
<td>Due to multiple etiologies</td>
<td>Code all of the etiological medical conditions first (with the exception of vascular disease)</td>
<td>F02.8x (Plus the code for the relevant substance/medication-induced major neurocognitive disorders if substances or medications play a role in the etiology.)</td>
<td>G31.84 (Plus the code for the relevant substance/medication-induced mild neurocognitive disorders if substances or medications play a role in the etiology. Do not use additional codes for the presumed etiological medical conditions.)</td>
</tr>
<tr>
<td>Unspecified neurocognitive disorder</td>
<td>No additional medical code</td>
<td>R41.9</td>
<td></td>
</tr>
</tbody>
</table>

<sup>a</sup> Code first, before code for major neurocognitive disorder.

<sup>b</sup> Code fifth character based on symptom specifier: .x0 without behavioral disturbance; .x1 with behavioral disturbance (e.g., psychotic symptoms, mood disturbance, agitation, apathy, or other behavioral symptoms).

<sup>c</sup> **Note:** Behavioral disturbance specifier cannot be coded but should still be indicated in writing.

<sup>d</sup> See “Substance/Medication-Induced Major or Mild Neurocognitive Disorder.”

</table>
| **Major or Mild Neurocognitive Disorder Due to Alzheimer’s Disease** | **Coding note:** For major neurocognitive disorder due to probable Alzheimer’s disease, with behavioral disturbance, code first **G30.9** Alzheimer’s disease, followed by **F02.81**. For major neurocognitive disorder due to probable Alzheimer’s disease, without behavioral disturbance, code first **G30.9** Alzheimer’s disease, followed by **F02.80**.  
For major neurocognitive disorder due to possible Alzheimer’s disease, with behavioral disturbance, code first **G30.9** Alzheimer’s disease, followed by **F02.81**. For major neurocognitive disorder due to possible Alzheimer’s disease, without behavioral disturbance, code first **G30.9** Alzheimer’s disease, followed by **F02.80**.  
For mild neurocognitive disorder due to Alzheimer’s disease, code **G31.84**. *(Note: Do not use the additional code for Alzheimer’s disease. Behavioral disturbance cannot be coded but should still be indicated in writing.)*  
*This coding note appears in DSM-5, pp. 611–612; in Desk Reference, p. 306.* |
| **Major or Mild Frontotemporal Neurocognitive Disorder** | **Coding note:** For major neurocognitive disorder due to probable frontotemporal lobar degeneration, with behavioral disturbance, code first **G31.09** frontotemporal disease, followed by **F02.81**. For major neurocognitive disorder due to probable frontotemporal lobar degeneration, without behavioral disturbance, code first **G31.09** frontotemporal disease, followed by **F02.80**.  
For major neurocognitive disorder due to possible frontotemporal lobar degeneration, with behavioral disturbance, code first **G31.09** frontotemporal disease, followed by **F02.81**. For major neurocognitive disorder due to possible frontotemporal lobar degeneration, without behavioral disturbance, code first **G31.09** frontotemporal disease, followed by **F02.80**.  
For mild neurocognitive disorder due to frontotemporal lobar degeneration, code **G31.84**. *(Note: Do not use the additional code for frontotemporal disease. Behavioral disturbance cannot be coded but should still be indicated in writing.)*  
*This coding note appears in DSM-5, p. 615; in Desk Reference, pp. 307–308.* |
| **Major or Mild Neurocognitive Disorder With Lewy Bodies** | **Coding note:** For major neurocognitive disorder with probable Lewy bodies, with behavioral disturbance, code first **G31.83** Lewy body disease, followed by **F02.81**. For major neurocognitive disorder with probable Lewy bodies, without behavioral disturbance, code first **G31.83** Lewy body disease, followed by **F02.80**.  
For major neurocognitive disorder with possible Lewy bodies, with behavioral disturbance, code first **G31.83** Lewy body disease, followed by **F02.81**. For major neurocognitive disorder with possible Lewy bodies, without behavioral disturbance, code first **G31.83** Lewy body disease, followed by **F02.80**.  
For mild neurocognitive disorder with Lewy bodies, code **G31.84**. *(Note: Do not use the additional code for Lewy body disease. Behavioral disturbance cannot be coded but should still be indicated in writing.)*  
*This coding note appears in DSM-5, pp. 618–619; in Desk Reference, p. 309.* |

Neurocognitive Disorders
Numerical Listing of DSM-5 Diagnoses and Codes (ICD-10-CM)

This excerpt provides the updated ICD-10-CM codes for major neurocognitive disorders
due to possible etiologies and reintegrates their placement with other major neurocognitive
disorders in the listing. Disorders outside this category or alphanumerical set are not
included here.
(DSM-5 only, pp. 877–878; on p. 892, delete the ICD-10-CM code G31.9 and all
corresponding entries; not applicable to Desk Reference)

ICD-10-CM codes are to be used for coding purposes in the United States starting October 1, 2015.
